-  **Education Technology**
-  **Smart Manufacturing**
-  **Agritech**
-  **Digital Technology**
-  **& Many More**

## Innovation at Work

BARAS is derived from the word "Barasoain Church," one of the famous landmarks in the Bulacan. During Spaniard colonization, the church is known as the "dungeon of the Defiant" or in Filipino, 'Baras ng Suwail."

Inspired by the same motivation, BARAS TBI aims to develop startups with revolutionary ideas that will defy norms through establishing a startup ecosystem with active engagement from the academe, government, and industry.

Innovation at Work

# Mission

Establish a community of Innovative minds with the desire to create disruptive solutions by fostering collaboration among the academe, government for startups to accelerate ideas to commercialization

# Vision

To be the premiere technology business incubator in the region.

# Goals

Activate Desire for Technology Business Build Strong Linkages Expedite Startup Potential.

# Objectives

- Establish the TBI Facility
- Foster Entrepreneurial Spirit
- Help Create/ Establish startups with successful Business Models
- Establish Network and Harmonize Connections between the academe, government agencies and industries.
- Manage the TBI as a businesslike enterprise, which progressively recovers significant proportions of its operating costs.

# What we do?

Created to foster technology business among neighboring academic institutions and find promising technology-driven researches viable for commercialization

The incubator's premiere program for education and training in line with its goal to activate desire for technology business through bootcamps with the biggest impact and relevance to current market needs.

A weekend-long, hands-on experience in the form of a hackathon where entrepreneurs and aspiring entrepreneurs can meet, engage, and collaborate to create startup ideas

A year-long intensive incubation program including pre-incubation program that offers space and helps startups grow and scale fast through individual mentoring sessions with experts on technology, finance, management, intellectual property and market research.

The culmination of the incubation program through Demo-day Presentation, Senior Partner Pitch and SiestaMustahan that connects startups to possible investors for startup opportunities
